Darul Solution

2025 – 2026 | Karachi, Pakistan

📁 PROJECTS

Shams Student Management System

A Digital Management Platform Designed to Streamline Student Records and Operations in Coaching Institutes

- Developed a web-based system for managing student records in a coaching institute
- Maintains student profiles, academic data, and attendance records
- Helps reduce manual record-keeping and improves data accuracy

Carpool Web App

A Web-Based Ride Sharing Platform for Efficient and Cost-Effective Travel

- Developed a web-based carpooling platform to connect users traveling on similar routes
- Implemented core features such as ride listing, user interaction, and navigation
- Applied real-world concept of ride-sharing systems to reduce cost and improve efficiency

Car Rental Web Application

Full-Stack Car Rental Booking System using Next.js, TypeScript, Prisma, PostgreSQL, and Tailwind CSS

Developed a full-stack car rental web application where users can reserve vehicles by selecting pick-up location, pick-up date, return date, car class, and renter status.

AWS ECS Commerce Microservices Application

Cloud-Native E-Commerce Microservices Deployment using AWS ECS, Docker, Terraform, RDS, Redis, and GitHub Actions

Developed and documented a cloud-native e-commerce microservices application designed for deployment on AWS ECS Fargate. The project includes a Next.js frontend, API gateway, and backend services for catalog, cart, orders, payments, and notifications.
